

Enhanced Rail Network with the Cross Island Line

The Cross Island Line (CRL) Phase 1 will comprise 12 stations from Aviation Park to Bright Hill and is expected to be completed by 2030. Two of the new MRT stations that will be built are Ang Mo Kio Interchange Station and Teck Ghee Station.

1 Ang Mo Kio Interchange Station

Located at the junction of Ang Mo Kio Avenues 3 and 8, this future underground station will have a new walking and cycling bridge connecting to Town Garden East.

2 Teck Ghee Station

Located between Bishan-Ang Mo Kio Park and Ang Mo Kio Street 31, this future station will have a new walking and cycling bridge across Marymount Road to improve connectivity of Bishan-Ang Mo Kio Park.

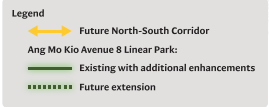

Creating Community Corridors

There are two upcoming mobility corridors along Ang Mo Kio Avenues 6 and 8, which will feature new footpaths, cycling paths, community spaces and facilities.

North-South Corridor Along Ang Mo Kio Avenue 6

The North-South Corridor (NSC) will comprise the expressway (viaduct and tunnel), street level space with wider footpaths, cycling paths, bus priority measures and public spaces.

Changing Streetscapes

Residents can enjoy more community spaces, be it for walking, exercising, meeting others or enjoying events. Bus commuters will also travel on bus lanes and possibly bus-only stretches too.

Bringing You Closer to Nature

The NSC will connect to existing Park Connectors and parks, such as Bishan-Ang Mo Kio Park and Town Garden West, making it easier for residents to access nature and recreational opportunities.

隨著地鐵跨島線的建成，区内轨道交通将更为便利，宏茂桥6道和8道沿线也将推出两条便于通勤的长廊。

Ang Mo Kio Avenue 8 Linear Park

As part of the efforts to transform Ang Mo Kio into a Walking and Cycling Town, the Ang Mo Kio Avenue 8 Linear Park will be extended to stretch from Yio Chu Kang MRT to Bishan Road.

Play Corridor Along Ang Mo Kio Town Centre

The western edge of the Town Centre will be rejuvenated with a traffic-themed play space and will double-up as a rest stop for cyclists traveling across Ang Mo Kio.
