TO-BE-BUILT MIXED DEVELOPMENT

Harmony Village @ Bukit Batok

Project Overview

Located at Bukit Batok West Avenue 9, Harmony Village is the first Community Care Apartments development to support seniors with senior-friendly design provisions within the flats, and access to care services, amenities and facilities such as a hawker centre and senior activity centre.

Harmony Village is conceived through the lenses of the elderly community and designed with expansive social interaction spaces to foster a strong community. The Community Care Apartment blocks have a dedicated community living space on each level, where residents can get together to catch up or engage in social activities.

Harmony Village's design aims to galvanise the residents to spend time together and live a shared experience. It is a nexus that plays a part in the community's ever-changing story and the beginning of an exciting new chapter.
