DESIGN AWARD REJUVENATION

Neighbourhood Renewal Programme at Choa Chu Kang Street 62 / North 7

Project Overview

The neighbourhood renewal programme at Choa Chu Kang Street 62 aims to combine the greenery of Yew Tee Park with the everyday life in the neighbourhood, by creating pockets of spaces that complement and blend seamlessly with the existing surroundings. Connectivity within the precinct is enhanced by the linking of various focal nodes, by creating thoroughfares that are enhanced with greenery.

The design also seeks to complement the existing site conditions. The unique terrain of Yew Tee Park inspired the development of a hilltop gathering place with hardcourt for communal activity and raised pavilion, while a customised playground with an 8 metres high slide was designed on sloped terrain. New linkways and drop-off porches were designed with a similar roof typology to harmoniously integrate with existing ones.
