

Envisioned as a green oasis, the lushly landscaped courtyard gardens provide residents with a quiet respite from the hustle and bustle

INNOVATIVE DESIGN AWARD

TO-BE-BUILT HOUSING

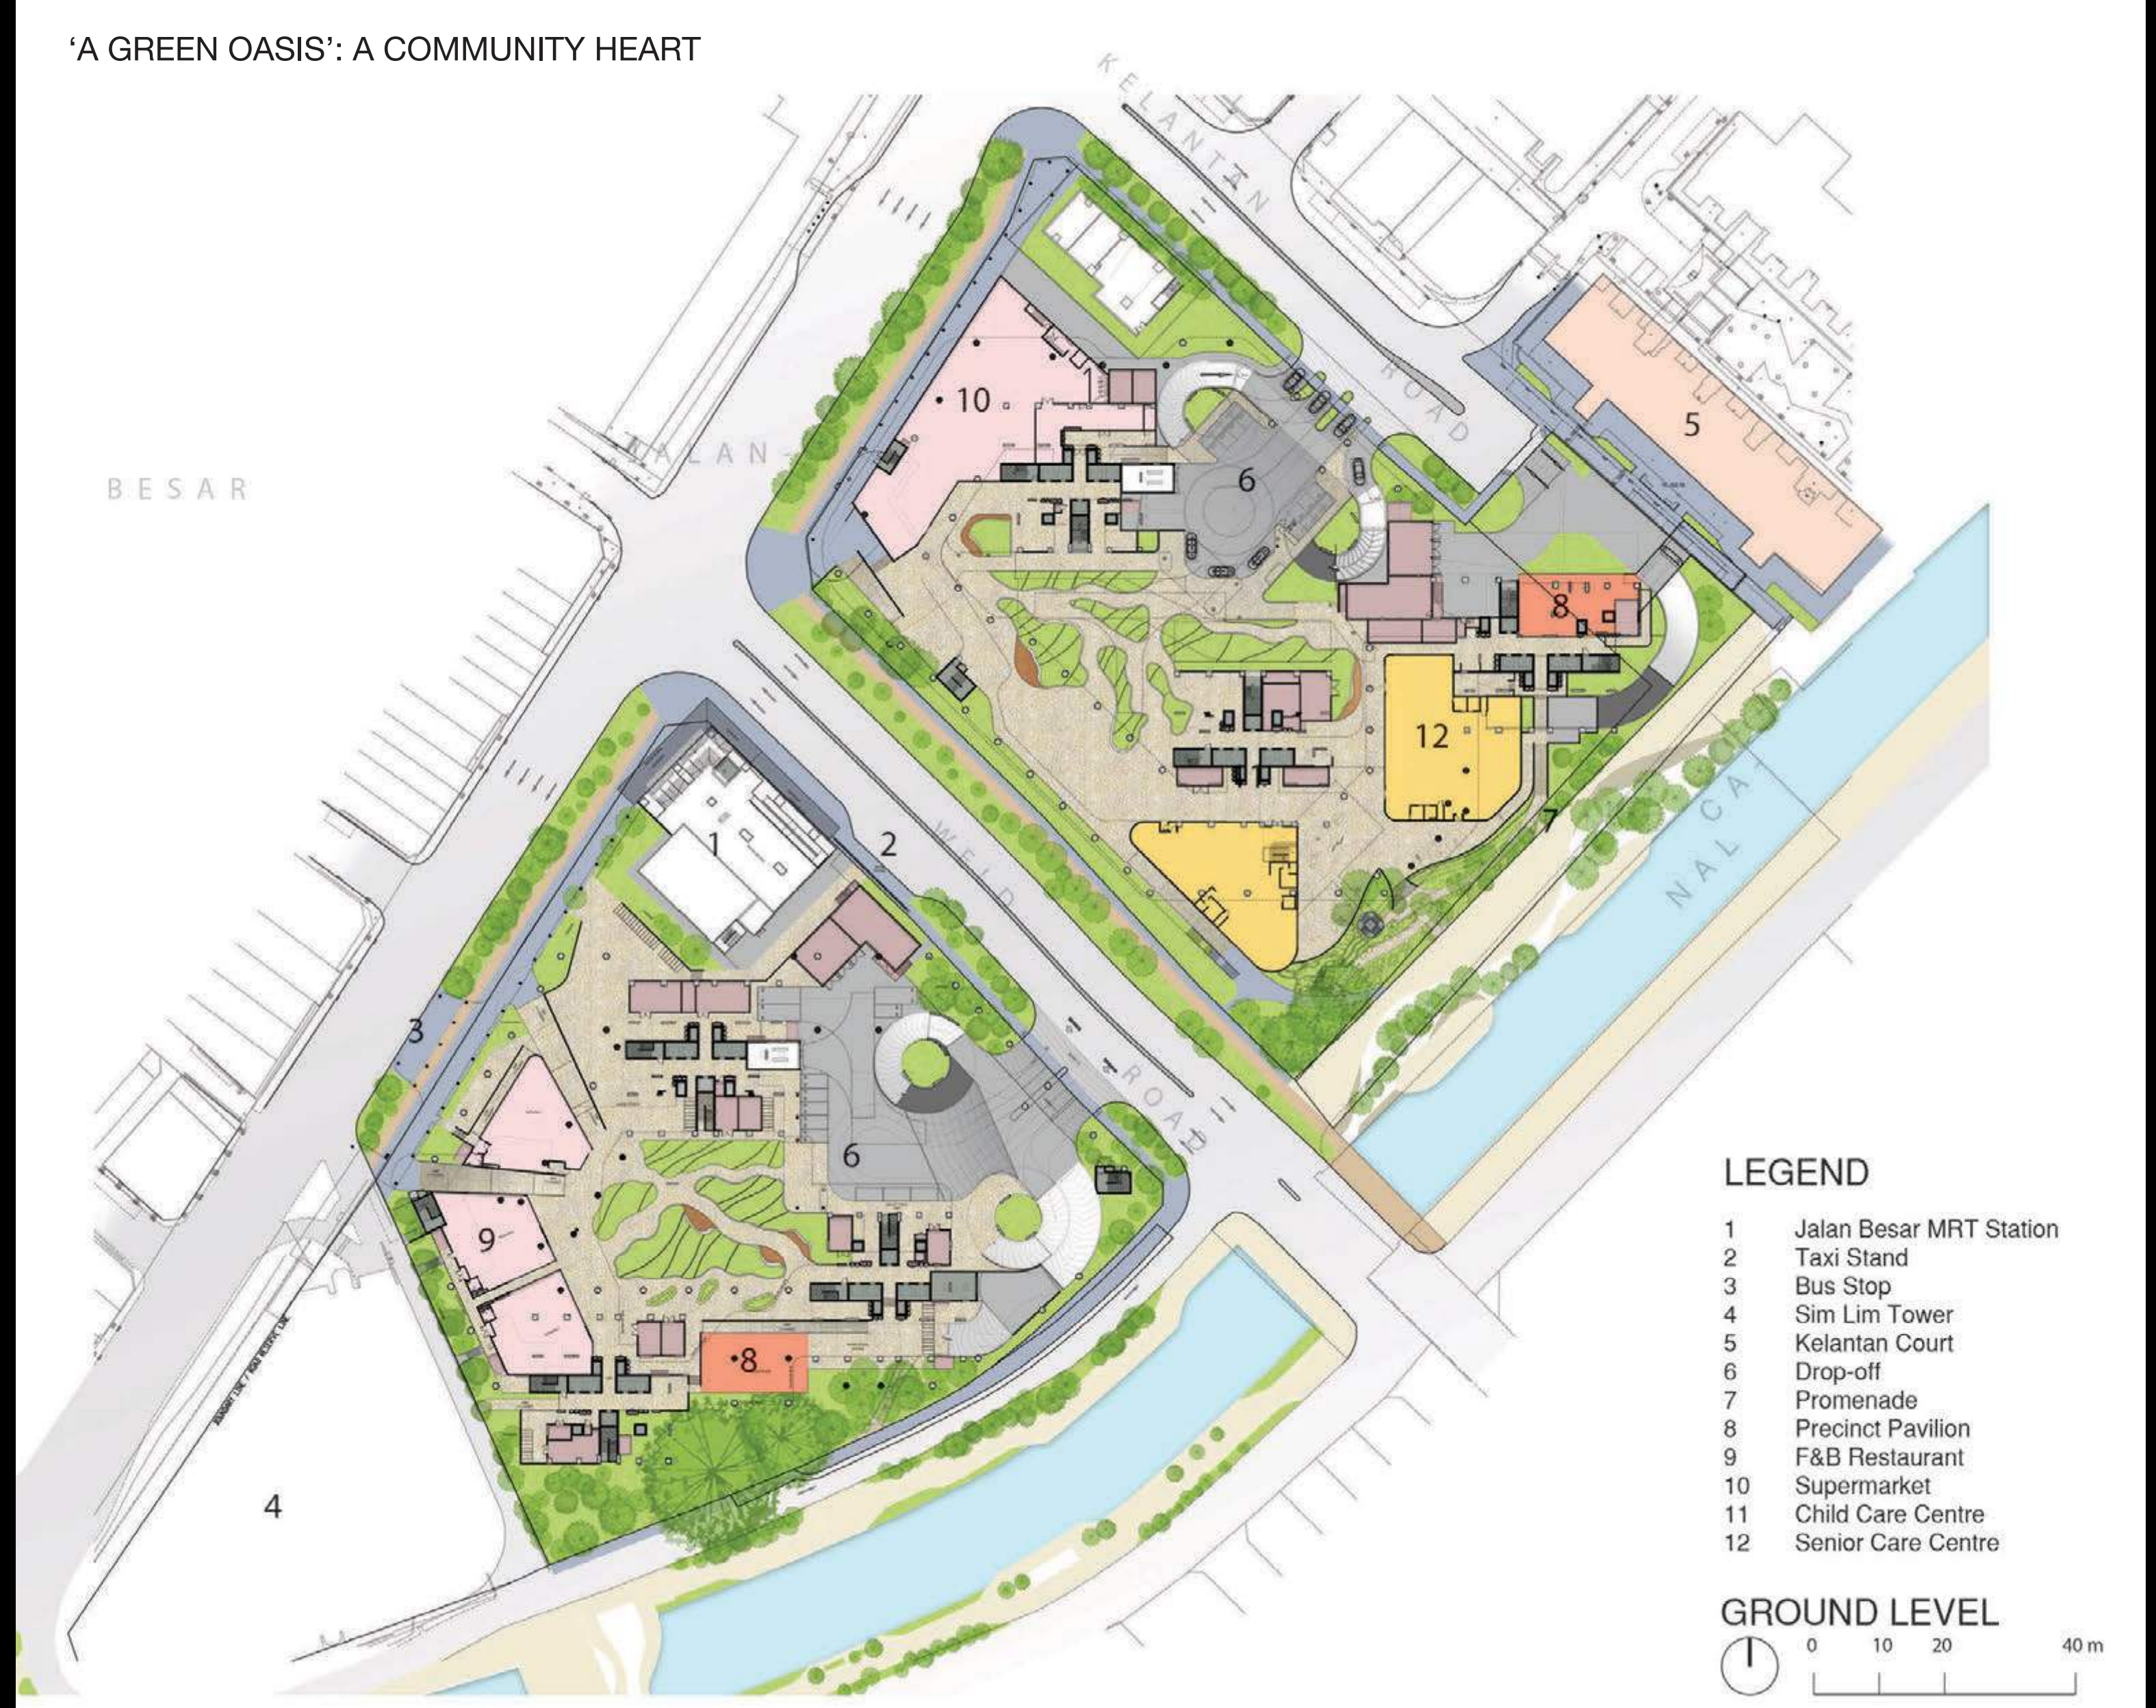

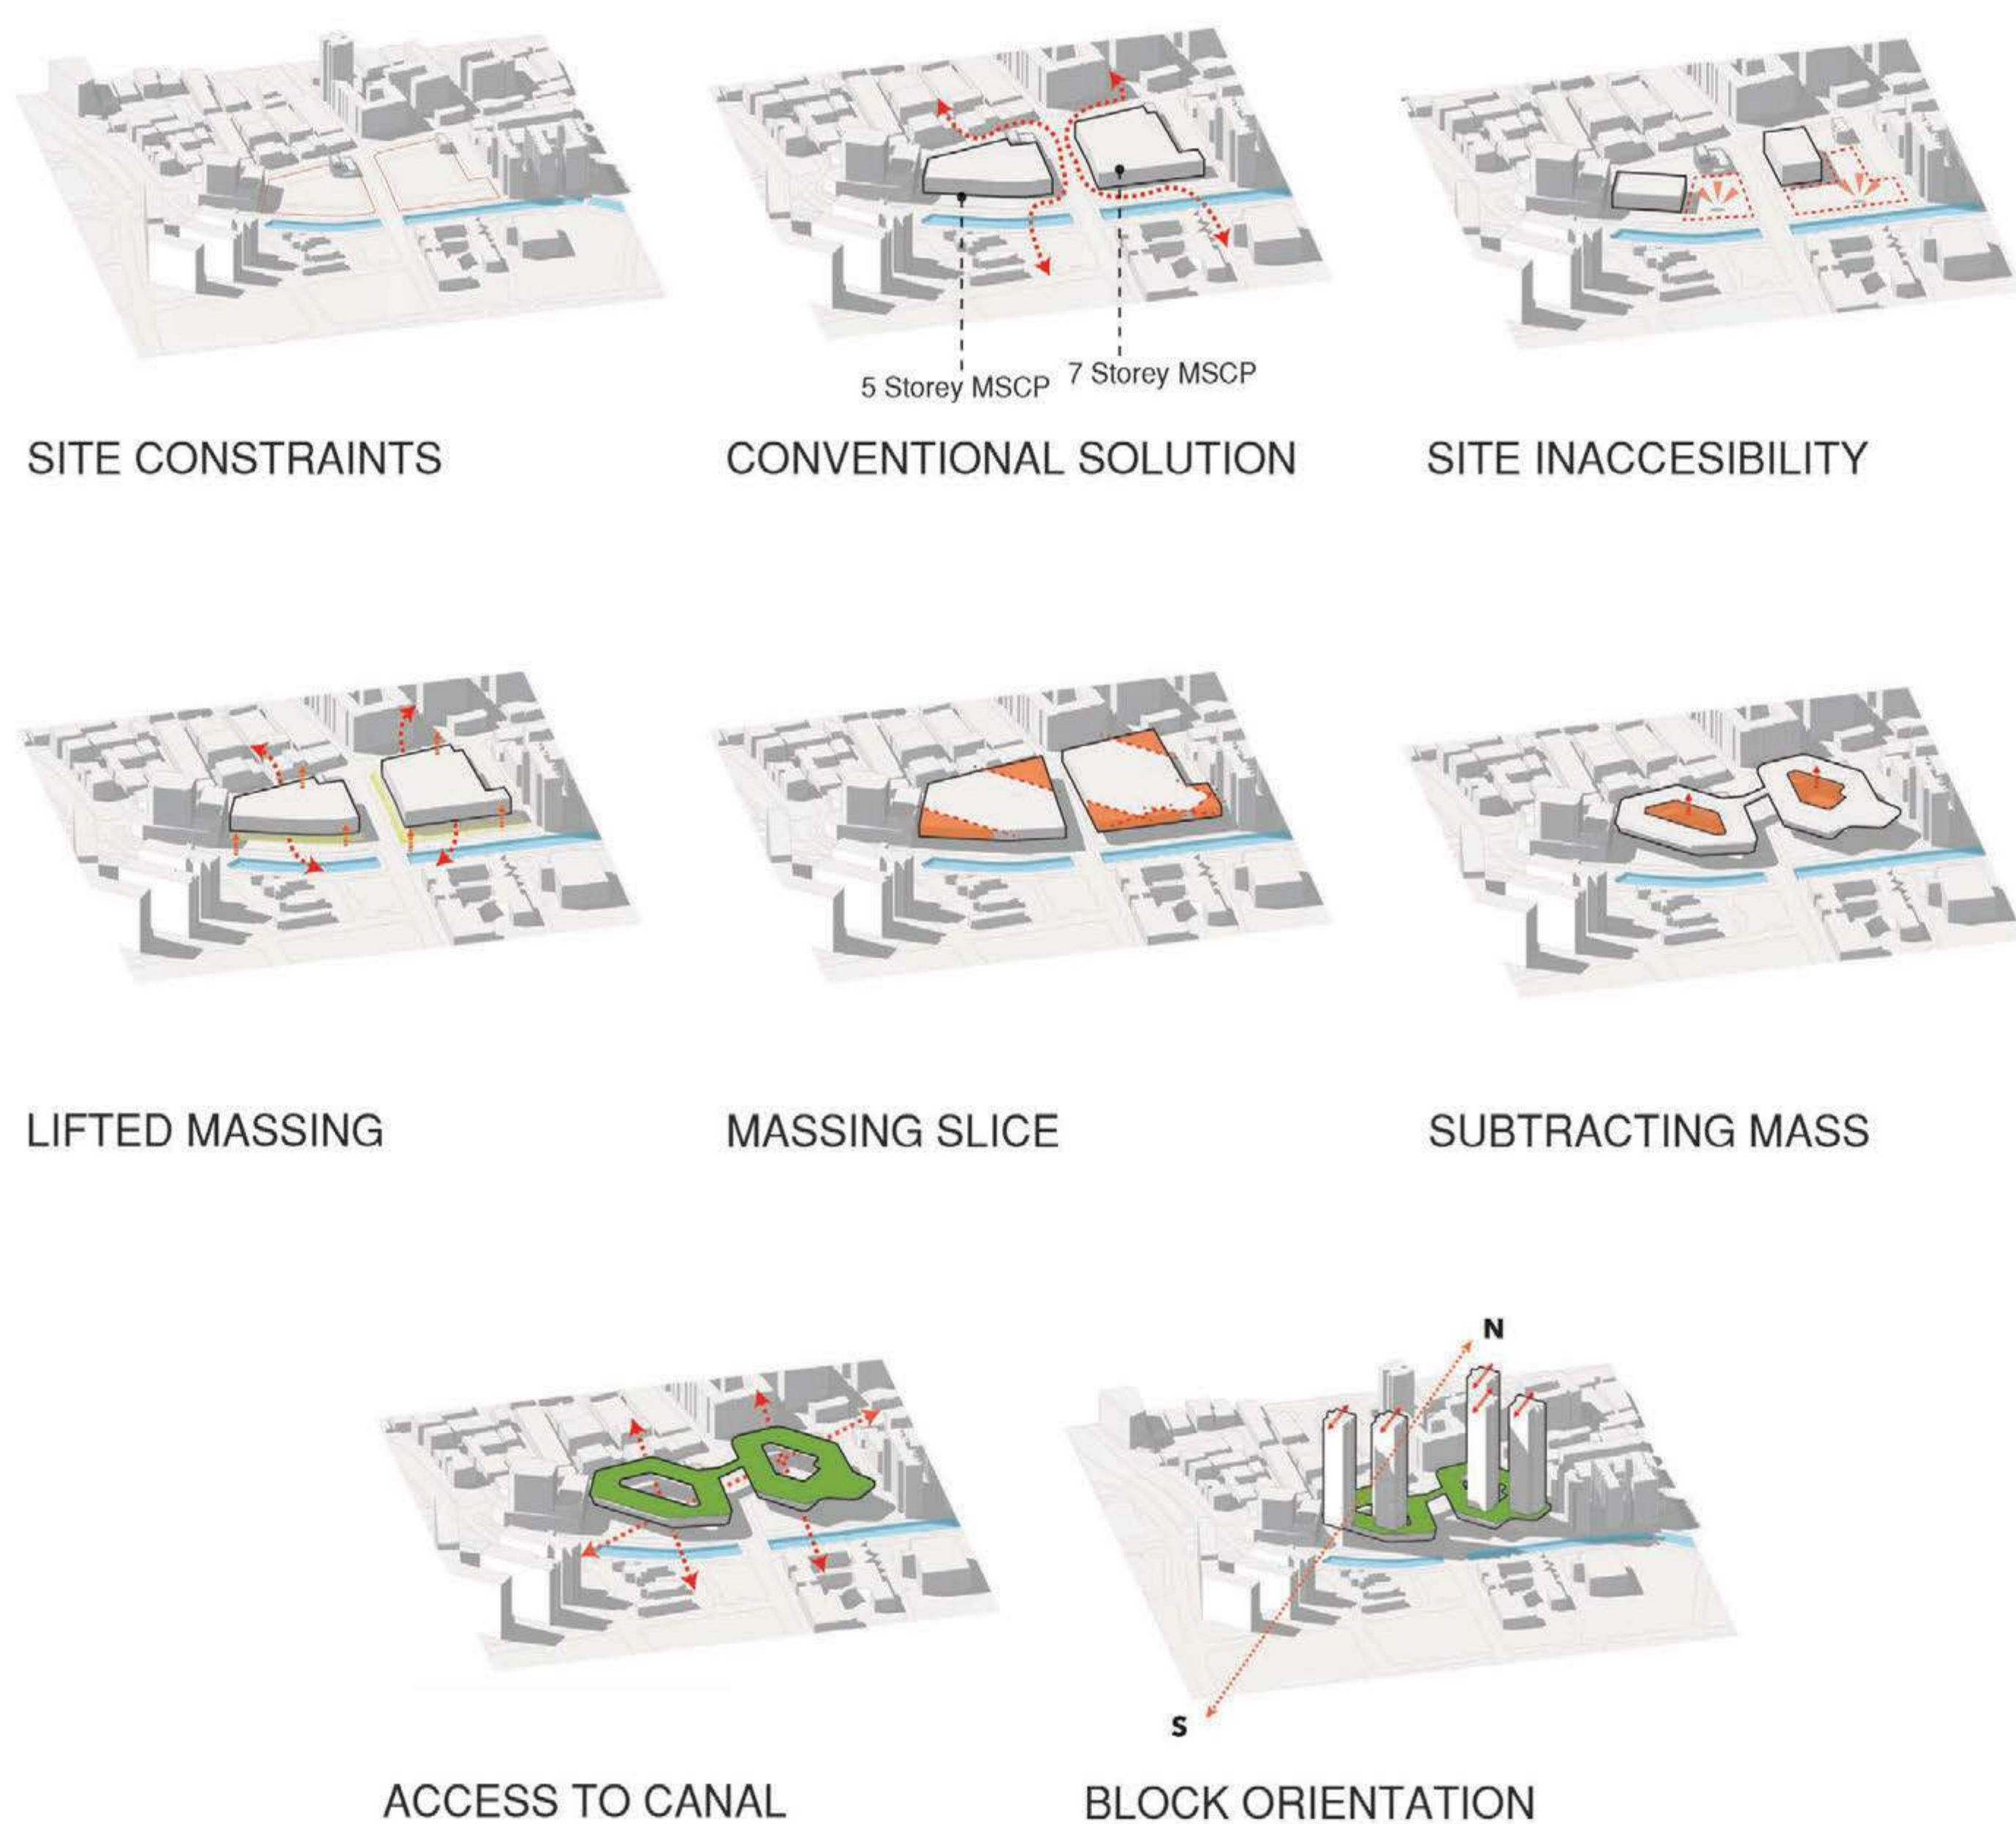

River Peaks I & II

Project Overview

The design of River Peaks I & II features strong urban geometry formed by the distinct podium and tower blocks. This design advocates a vertical segregation of uses, making use of air-space to create pockets of spaces and greenery.

This new urban design typology overcomes challenges of high-density urban living, by integrating open space planning, traffic and service management, connectivity of nodes and public transport, landscaping, strategic placement of social communal and commercial facilities and housing to create an exciting and vibrant public housing development in the city centre.

In addition, elevating the car park podium above ground enhances connectivity throughout the development at the ground level, and between the city and river edge.

Urban Gardens as Gathering Spaces
